DETAILED ACTION

Election/Restrictions

1. Newly submitted claims 17 and 18 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The invention of claims 17 and 18 are directed to a method applying polarized films to a transparent medium which is classified in class 156, subclass 99, and can be used with a materially different product such as using plurality polarized films provided for successive lamination stacking.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 17 and 18 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Rejections Withdrawn

Claims 1-15 rejected under 35 U.S.C. 112, second paragraph for reasons of record in paper-2, paragraph-2, mailed April 29, 2003.

Rejections Maintained

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated over Miyatake for reasons of record in paper-2, paragraph-5, mailed April 29, 2003.

Claims 1-3, 8, 12 and newly submitted claim 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miyatake for reasons of record in paper-2, paragraph-7.

Claims 13-15 are rejected under 35 U.S.C. 103(a) for reasons of record in paper-2, paragraph-8.

Claims 1-3, 8, and 12-15 are rejected under 35 U.S.C. 112, first paragraph for reasons of record in paper-2, paragraph-10.

Response to Arguments

2. Applicant's arguments filed August 27 and October 2, 2003 have been fully considered but they are not persuasive.

Applicant argues that Miyatake fails to teach or suggest size, shape and orientation of polarization apertures in the polarized films. This is not deemed to be persuasive because Miyatake teaches that the polarized films are provided with desired orientation angle, which would include the size and shape, for controlling the transmittance of light. Further, Miyatake teaches the presence of multiple films and hence each would exhibit sizes, shapes and orientation angle.

As for the non-enabling disclosure for the "curing time period of approximately 72 hours", it is still unclear from applicants explanation and the instant specification as to what adhesives would exhibit said curing time. Applicant's mere argument that the art shows that the adhesives are known in the art and that readily available, presumably at

any desired curing rate, and the absence of any showing as to the adhesive exhibiting said curing time, it is still not clear to how such an adhesive be used by one of ordinary skill in the art.

Regarding the newly submitted claim 16, Miyatake teaches that the adhesive is disposed on the bottom side of each film and hence, the films are attached to each other.

Therefore, in the absence of any evidence to the contrary, it remains the examiner's position that the claimed invention is anticipated or rendered obvious and the disclosure being non-enabling in view of the art discussed above.

3. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

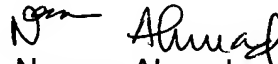

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
